Projects [<https://github.com/ramwakchaure>]

Website for trek hosting company (HTML, CSS, PHP, MySQL):

- Developed responsive website for trek hosting company using HTML, CSS, PHP and MySQL. Implemented user registration flow with front-end form validation and secure back-end handling. Stored user sign-ups in MySQL database tables. Built admin portal to view and manage submissions. Demonstrated skills in responsive UI creation, back-end database connectivity, input sanitization and overall full-stack development.

Portfolio Website (HTML, CSS, JavaScript):

- Designed and developed a dynamic portfolio website, leveraging HTML, CSS, and JavaScript to create an engaging user experience. Demonstrated creativity and technical expertise in crafting a visually appealing online showcase of my projects, skills, and achievements. Implemented responsive design principles to ensure seamless accessibility across devices. The website serves as a testament to my ability to combine aesthetics with functionality and effectively communicate my professional profile.
